Expt

Experiment - 13

Demonstrate network forensics using Pcap Xray tool

Aim:

To perform network forensics by analyzing a packet capture (PCAP) file using the PCAP x-Ray tool to identify network protocols, suspicious activities, communication patterns, transferred files & security indicators

Procedure:

Step 1: Obtain a PCAP file & open PCAP x-Ray Tool

Step 2: Upload the PCAC File

Step 3: View the Dashboard After processing, the dashboard

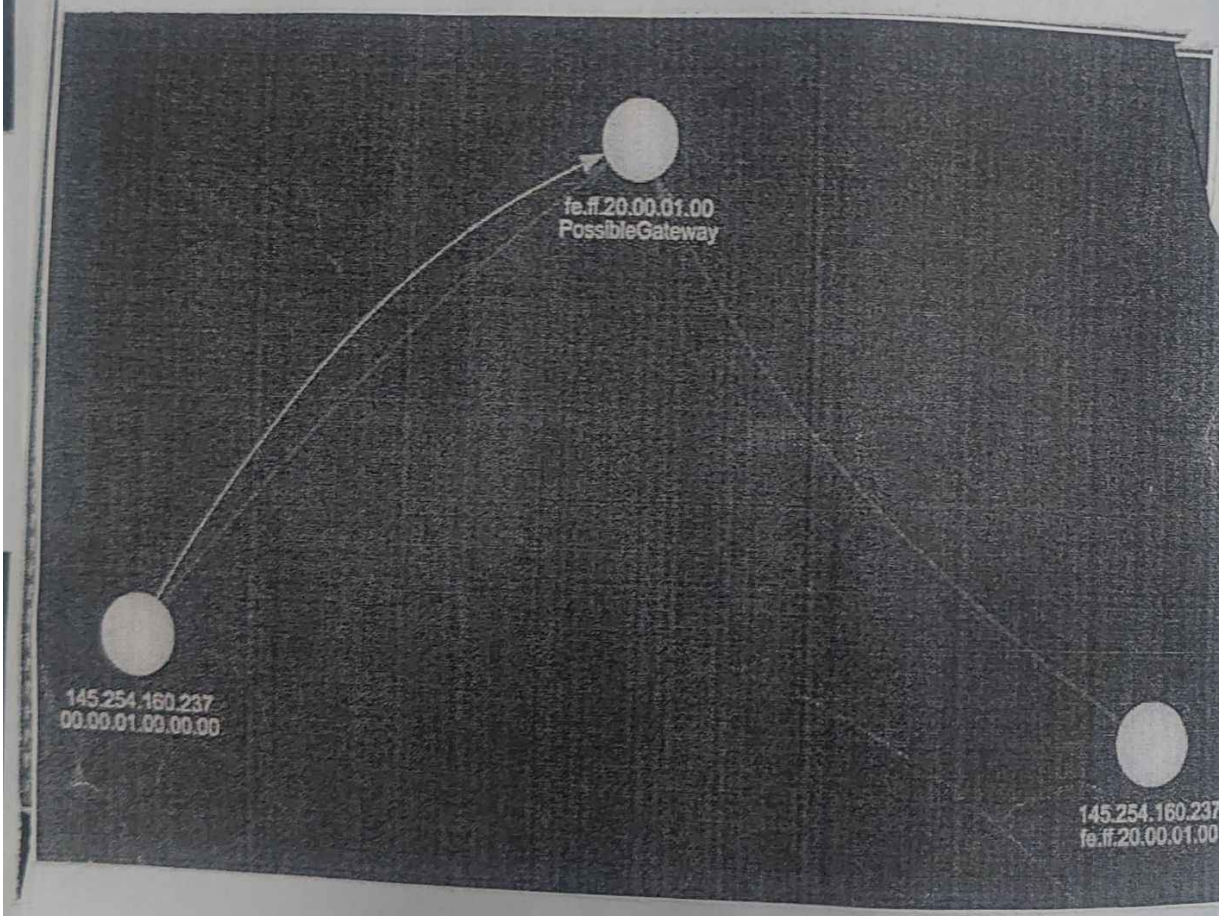

Step 4: Analyse Protocol Distribution & Examine Source & Destination Hosts

Step 5: Analyze DNS & Inspect HTTP Requests & Review TLS/HTTPS & Inspect Conversation

Step 6: Check for Credentials & Extract Files

Result:

Thus the experiment to perform network forensics by analysing a packet capture using PACP x Ray tool Executed successfully
