Experiment - 15

To Analyze the different types of servers using Webalizer tool

Aim:

To install, configure, and use the webalizer tool to analyse web server log files & generate statistical reports for different types of web server

Procedure

Step 1: Update the System & Install Apache Web Server

Step 2: Verify Apache server & Generate web traffic

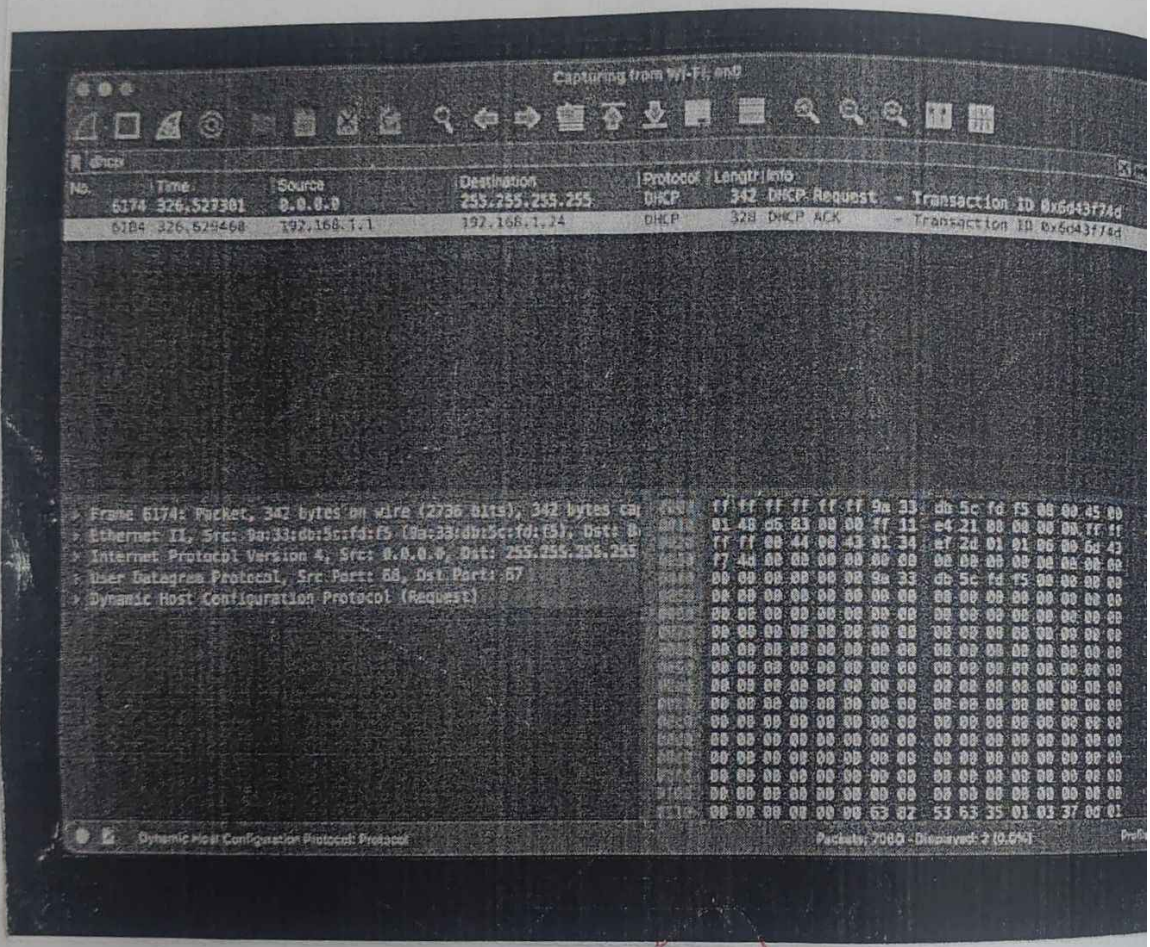

Step 3: Locate the Apache Log file, Install Webalize

Step 4: Configure Webalizer & Create the Output Directory

Step 5: Generate the Report & Analyse the Reports

Result:

Thus the experiment to install, configure & use the webalizer tool to analyse web server executed successfully
