Experiment - 5

Develop a customized ping command to test the server connectivity

Aim:

To develop a customized Ping command in Python that checks the connectivity between a client and a server by sending ICMP Echo Request packets and displaying the response time & status

Steps

Step 1: Install Python & open VS code

Step 2: Create project folder & write the program

Step 3: Execute & Enter website

Step 4: Note the result

Result:

Thus, the program to develop a customized Ping Command in Python executed & implemented successfully

```
import subprocess
import platform

print("=" * 50)
print("Customized Ping Utility")
print("=" * 50)

host = input("Enter Website or IP Address: ")

system = platform.system()

if system == "Windows":
    command = ["ping", "-n", "4", host]
else:
    command = ["ping", "-c", "4", host]

try:
    result = subprocess.run(command, capture_output=True, text=T

    print("\nPing Results\n")
    print(result.stdout)

    if result.returncode == 0:
        print("Server Status : Reachable")
    else:
        print("Server Status : Unreachable")

except Exception as e:
    print("Error:", e)
```

Output :

Enter Website or IP : google.com

Ping Results

RPinging google.com [142.251.221.142] with 32 bytes of data

Reply from 142.251.221.142: bytes=32 time=5ms TTL=120

Reply from 142.251.221.142 : bytes=32 time=5ms TTL=120

Reply from 142.251.221.142 : bytes=32 time=23ms TTL=120

Ping statistics for 142.251.221.142:

Packets: Sent=4, Server status : Reachable
