Experiment - 8

Develop a program to create reverse shell Using TCP socket

Aim:

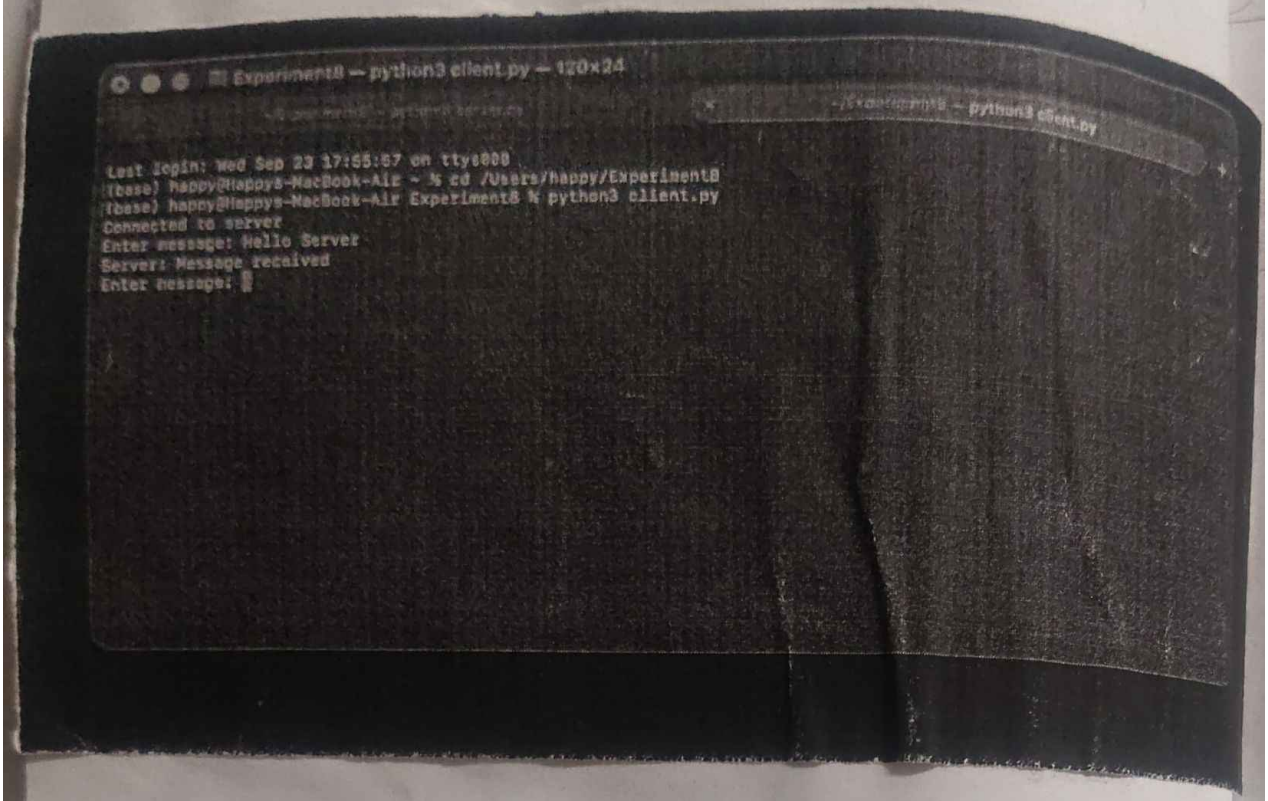

To develop a TCP socket-based client-server program that demonstrates reverse-shell communication by connection between client & server

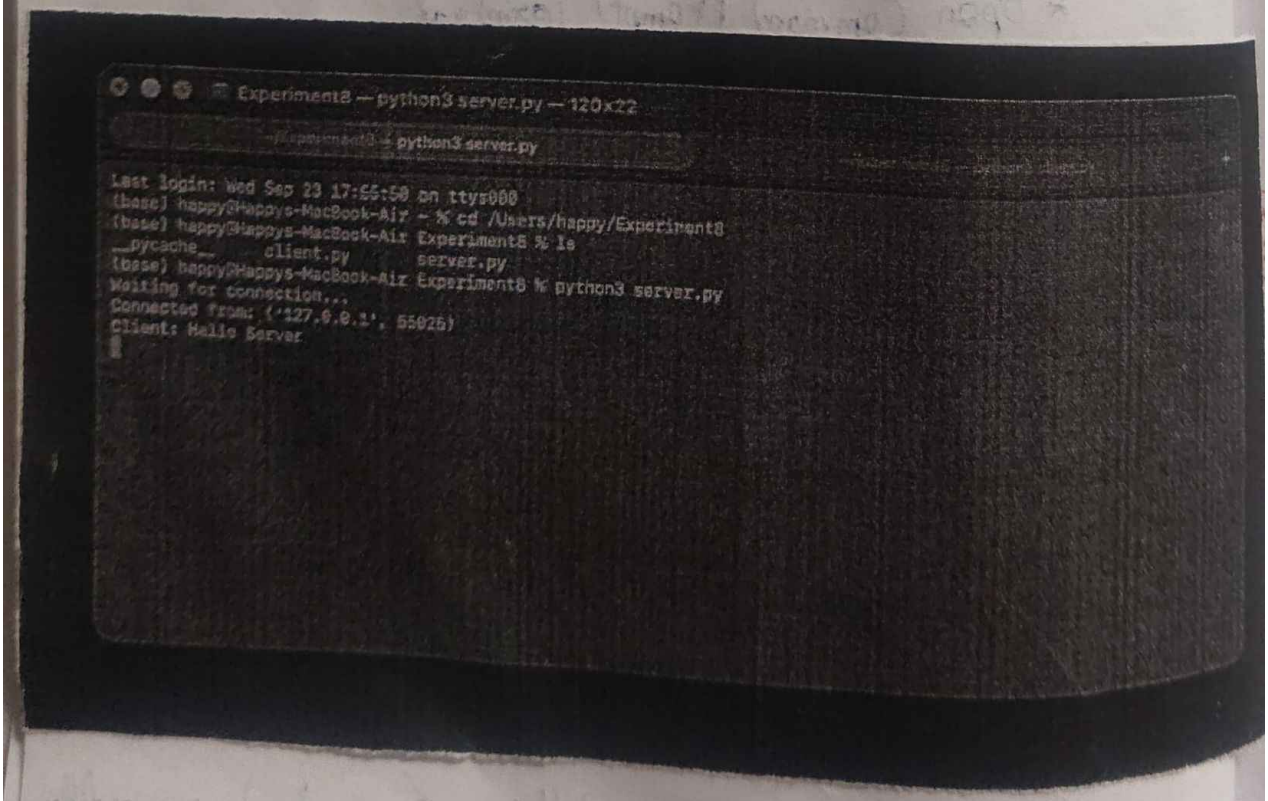

Procedure

* Create the Server named server.py
* Create the Client name client.py
* Run the server
* Run the Client
* Test Multiple Messages

Result

Thus the program to develop a TCP socket that demonstrate reverse-shell executed successfully

Experiment8 — python3 client.py — 120×24
